

AIN AHMMAD

Fullstack Developer

London real.world.developer@gmail.com 07770 737 686 [linkedin.com/in/md-ain-uddin-ahmmad-a63357323](https://www.linkedin.com/in/md-ain-uddin-ahmmad-a63357323) realworlddeveloper.github.io/My-Portfolio/

Personal Statement

The rapid evolution of technology has sparked my interest in programming and business information systems, which has become the foundation of my career goals. I initially joined IT Career Switch to learn the basics of coding, which helped me understand how software works. Now, through my studies at Northcoders, I'm building a solid foundation in development and improving my problem-solving skills. My goal is to work with small businesses and marginalized communities, offering web design and development services. As a MERN stack developer, I'm constantly exploring new technologies to stay adaptable and continue learning, with the ultimate aim of becoming a versatile developer who can help bring ideas to life through technology.

Technical Skills

Frontend Development

- **HTML5:** Semantic markup, responsive design, and SEO-friendly structure.
- **CSS3:** Flexbox, Grid Layout, media queries, animations, transitions, Bootstrap.
- **JavaScript (ES6+):** DOM manipulation, event handling, asynchronous programming (Promises, async/await), ES6 features (arrow functions, spread operators, etc)
- **Frontend Frameworks React.js:** Components, hooks, state management, JSX, and virtual DOM.
- **Version Control/Git:** Git workflows, branching, merging, pull requests

Backend Development

- **Node.js:** Event-driven, Express.js, API development, RESTful services.
- **Database Management:** Relational Databases: PostgreSQL, NoSQL Databases: MongoDB
- **Backend Frameworks:** Express.js (Node.js): Middleware, routing, and request/response handling.
- **API Development:** REST APIs: Stateless APIs, CRUD operations, authentication, and error handling.
- **Testing:** Jest

Projects

Articles Blog

GitHub Link: github.com/RealWorldDeveloper/nc-news

A dynamic blogging platform where users can create, edit, and manage articles with ease. The platform features a sleek and responsive user interface, ensuring an engaging experience for users.

Technology Used: React for the frontend, Express.js for server-side operations, and PSQL for database management.

- User authentication and profile management.
- Categories and tags for better content organization.
- Search functionality to find articles quickly.
- Optimized for both desktop and mobile devices.

OurFlicks

https://northcoders.com/project-phase/ourflicks

A user-friendly movie application allowing users to explore, search, and manage movies seamlessly. The app integrates a sleek and interactive interface, ensuring an enjoyable experience across devices.

Technology Used: React Native for the frontend, Express.js for server-side operations, SQL for database management, TMDB API for movie data, and TypeScript for type safety.

- User authentication and profile management.
- Personalized movie lists and watchlists for users.
- Detailed movie information fetched dynamically from the TMDB API.
- Cross-platform compatibility optimized for both Android and iOS.

Professional Development

Northcoders 10/2024 to 01/2025

- Completed an intensive software development bootcamp focused on modern development practices.
- Gained hands-on experience in Git and GitHub, JavaScript (ES6+), TDD with Jest, HTML, CSS, and backend technologies including Node.js and Express.js.
- Built real-world projects under guidance, focusing on problem-solving, teamwork, and agile methodologies.
- Emphasized best practices in coding, testing, and version control.

IT Career Switch 10/2023 to 02/2024

- Certified foundation of web development through IT Career Switch's professional training program.
- Mastered foundational skills in HTML, CSS, and JavaScript.
- Recognized for successfully completing projects with a focus on responsive design and clean coding practices.

EXPERIENCE

Customer Assistant (Driver section)/ Uber Green Hub 01/2021 to Current

- Helping drivers resolve issues related to rides, payments, and account management.
- Providing information about services, promotions, and policies.
- Gathering customer feedback to improve services and relay important information to management.
- Assisting users with app-related issues and guiding them through features.

Sales Assistant / Moto Hospitality West Thurrock, Essex 01/2017 to 12/2020

- Addressed and resolved complex customer complaints in calm, efficient and friendly manner.
- Boosted sales and improved customer satisfaction by providing attentive, personalised client services.
- Performed closing duties such as cleaning windows and floors, securing shop premises and cashing up tills.
- Processed cash and card payments during busy shopping periods to minimise customer waiting times.

Education

Executive MBA / London Greenwich University 09/2018 to 08/2019

Grade: Pass

Modules: Accounting, Management, Project Management, Statistics.

BA Hons / London South Bank University 10/2016 to 10/2019

Grade: 2.2

Modules: Global Business Challenges, Financial Management, Contemporary Management Approach, Technological Change and Innovation, Project Management.

Hobbies and Interest:

Sports: Played competitive cricket at the second division level, fostering teamwork, strategy, and perseverance.

Travelling: Enjoys exploring diverse cultures, enhancing adaptability, and building a global mindset.

Coding: Focused on creating scalable web applications using modern frameworks.
